$\Sigma M : \Sigma C$

Where

$\Sigma C \geq 2 \times$  greater than  $\Sigma m$

And

$EA \leq 10$

OR

$\Sigma M : \Sigma C$

Where

$\Sigma C \geq 3 \times$  greater than  $\Sigma M$

And

$EA \geq 11$

...thought and feelings are mixed together during decision making activities.

...the goal of the decision is to result in the person feeling good.

...trial and error approaches are relied upon to reach their goals.

...errors in decision making are overlooked if the result is a bad feeling.

...failure to solve problems is met with increased emotional displays.

(Exner 1991, p. 192)
