

Clinical Scale Elevations

Scale(s) 4 (Pd)

T-scores # 74

All other scale scores # 60

Elevations on the present Scale(s), taking race, gender, age, education, marital and employment status into consideration for the corresponding group's data, indicate any or all of these clinical features could be present in this person's behavior and history:

They are good tempered, enthusiastic and fearless. They are frank, open, talkative, generous, and fair-minded. They look forward to "Happy Hour." They do not object to having a social joint or two. They hide the sensitive, sentimental side to their personality from others. They take real enjoyment from rough humor. They engage in competitive rough housing on the job and in their personal lives.
