

Clinical Scale Elevations

Scale(s) 5 (Mf)

Males T-score \$ 80

Females T-score # 45

Elevations on the present Scale(s), taking race, gender, age, education, marital and employment status into consideration for the corresponding group's data, indicate any or all of these clinical features could be present in this person's behavior and history:

They are self-effacing. They prefer employing indirect means to influence others. They are concerned for the welfare and happiness of people. They are frightened of expressing their genuine feelings and emotions to others.

They are drawn to bold, assertive, out-going, domineering partners. They have mastered the art of placating angry people. They are yielding collaborators given the opportunity.

They are interested in the management of a domicile, decoration, fashion, art, music, and cultural pursuits. They are capable of taking on other person's burdens as their own. They go out of their way to maintain contacts with people who they consider need them in their lives.

Their exertions may not be reciprocated in many instances. They find they attract people who are not willing or capable of returning their kindness, sensitivity, and generosity.
